 GENUINE RÖBEN BRICK SLIPS

 ОРИГИНАЛЬНЫЕ КЛИНКЕРНЫЕ
ОБЛИЦОВОЧНЫЕ ПЛИТКИ RÖBEN

 ORIGINELE RÖBEN BAKSTENEN STEENSTRIPS

 LES VRAIES PLAQUETTES KLINKER RÖBEN

 Roben

RÖBEN RIEMCHEN SIND ECHTE KLINKER – NUR GANZ DÜNN!

Sie sind zu 100% aus echtem, reinen Ton bei Temperaturen von über 1000°C gebrannt. Das macht sie enorm hart gegen Frost und Hitze, Starkregen und Hagel. Und das bleibt so: keine Pflege, keine Renovierung, keine Extrakosten. Klinker-Riemchen sind ihren Preis wert.

Klinkerriemchen werden nicht gemauert, sondern geklebt. Für die perfekte Ausgestaltung der Außenecken gibt es spezielle Winkelriemchen. Fertig verfugt, ist die geklebte Riemchen-Fassade nicht mehr von einer konventionell gemauerten Wand zu unterscheiden.

STRIP TILES ARE GENUINE CLINKER BRICKS – JUST EXTREMELY THIN!

Fired at temperatures greater than 1,000 °C, they are 100% made from genuine, pure clay. This makes them extremely resistant to frost and heat, heavy rain and hail. And it stays that way! Which means, no maintenance, no renovation, no additional costs. Strip tiles are well worth their price.

Strip tiles are not laid, they are bonded. There are special corners to perfect the design of external corners. Once pointed, the bonded façade can no longer be distinguished from a conventional brick wall.

ОБЛИЦОВОЧНЫЕ ПЛИТКИ RÖBEN - ЭТО НАСТОЯЩИЕ КЛИНКЕРНЫЕ КИРПИЧИ, ТОЛЬКО ОЧЕНЬ ТОНКИЕ!

Они на 100% изготовлены из чистой глины и обожжены при температуре более 1000° С. Это делает их чрезвычайно устойчивыми против мороза и жары, дождя и града. Они не требуют ухода, ремонта, дополнительных расходов. Клинкерные облицовочные плитки стоят своих денег.

Плитки не нуждаются в укладке, а просто приклеиваются. Для идеального оформления наружных углов есть специальные угловые облицовочные плитки. После расшивки швов фасад с наклеенными плитками невозможно отличить от кирпичного.

STEENSTRIPS ZIJN ECHTE BAKSTENEN – ALLEEN HEEL DUN!

Ze zijn voor 100% van echte, zuivere klei en bij temperaturen van meer dan 1000°C gebakken. Daardoor zijn ze bijzonder bestand tegen vorst en hitte, zware regenval en hagel. En dat op lange termijn: geen onderhoud, geen renovatie, geen extra kosten. Bakstenen steenstrips zijn hun prijs waard.

Bakstenen steenstrips worden niet gemetseld, maar gelijmd. Voor de perfecte vormgeving van de buitenhoeken zijn special hoeksteenstrips verkrijgbaar. Wanneer alles gevoegd is, is een gelijmde steenstripfaçade niet meer van een conventioneel gemetselde muur te onderscheiden.

LES PLAQUETTES SONT DE VRAIS KLINKERS – MAIS TOUT MINCES!

Elles sont cuites 100% en argile véritable et pure à des températures supérieures à 1000 °C. Cela les rend énormément dures et résistantes au gel et à la chaleur, à la pluie battante et à la grêle. Elles restent comme elles sont: aucun entretien, aucune rénovation, aucuns coûts supplémentaires. Les plaquettes en klinker sont dignes de leur valeur.

Les plaquettes en klinker ne sont pas maçonnées mais collées. Pour la réalisation parfaite des angles extérieurs, il y a des plaquettes d'angle spéciales. Une fois jointoyée, la façade en plaquettes collées ne se différencie absolument plus d'un mur maçonné de manière conventionnelle.
